Product Description

Are you still troubled by whether guests can have a comfortable and good sleep? Are you still worried about the pillow on the bed? A suitable and comfortable pillow is the guarantee that directly determines whether sleep is good or bad. Today, I will vigorously introduce our most comfortable hotel pillows.

Our pillow core is mainly made of high-quality fine cotton, including natural cotton for warp and weft yarns. Pure cotton fabric itself has a natural and unique softness, and there is no tingling sensation when the skin comes into contact with the pillow. The difference is that synthetic materials (polyester fibers) are prone to stuffiness, causing hair to become damp after sleeping, while pure cotton materials can quickly absorb and expel moisture, keeping the pillow dry and effectively avoiding sweating caused by stuffiness, which prevents customers from sleeping deeply all night.

We use the highest quality pure cotton fabric and advanced technology to fill the pillow core with full and elastic filling. In terms of design, we have specifically developed a design method that can conform to the curve of the human head, effectively reducing the damage to the cervical spine caused by the weight of the head, fundamentally preventing discomfort caused by pillowing and cervical spine, and relieving daytime work pressure and fatigue. At the corners, we use reinforced edge wrapping to effectively prevent the filling from shifting and ensure that the pillow can still be maintained during long-term use. After professional multiple tests and washing, we can still maintain a fluffy feeling, extend the service life, and greatly reduce operating costs.

This pillow core can not only be used in high-end hotels, but also in postpartum care centers, hospitals, and households. Most Comfortable Hotel Pillows is made of 100% pure cotton as its core material, which provides both comfort and peace of mind for health. Choosing it will ensure every guest has a good night's sleep.

Product name	Hotel pillows
Material	100% Cotton
weight	0.5-1 Kg
